

AQ-M257 Motor protection IED

The AQ-M257 offers a modular motor protection and control solution for larger and more important motors requiring differential protection. Up to 9 optional I/O or communication cards are available for extensive monitoring and control applications. Up to 16 RTD signals can be connected for thermal alarming and tripping. The AQ-M257 communicates using various protocols including IEC 61850 substation communication standard.

Highlights

- Differential protection
- Large I/O capability
- 5 time constant accurate thermal model
- Softstart protection starting from 6Hz
- Stardelta started motor supervision
- 2 speed motor protection
- Up to class 0.2S power and energy measurement
